TAX UPDATE

Your projected estimated taxable income for the year ended December 31, 2017 is projected to be \$5,700 a unit or \$1.14 a bushel.

In addition, if you sell your units you will be allocated taxable income based on the days of ownership that you owned the units during the year but any distribution that is declared and made by Bushmills is solely based on who owns the shares at the date the distribution is declared.

Please seek professional tax advice in determining your taxes or when thinking about selling your units because each individual tax situation is different.
